

7. FY05 TECHNICAL PROJECT “COMPARISON OF CHEVWQMN, CCHMN, AND SEAGRASS MONITORING PROGRAMS, WITH ESTUARY REGION SPECIFIC OPTICAL AND HABITAT SUITABILITY MODELS” UPDATE: REPORT REVIEW SUBCOMMITTEE

At the February 11, 2009 TAC meeting, Mr. Ray Leary, FDEP Charlotte Harbor Aquatic Preserves, presented the results of the “Comparison of CHEVWQMN, CCHMN and Seagrass Monitoring Programs with Estuary Specific Optical Models”, as well as the final draft report for the project.

The project is an FY08 Workplan project and implements the CCMP Priority Actions WQ-B, WQ-G and FW-F. The purpose the project is to provide in-depth comparisons of water quality data from the CHEVWQMN and CCHMN with seagrass data from the FDEP Charlotte Harbor Aquatic Preserves transect monitoring program and develop estuary specific optical models quantifying the relationships.

The TAC directed staff to form a subcommittee to review the final draft report. The subcommittee has been formed and a schedule developed to allow a recommendation regarding the report to be given to the TAC at its July 8, 2009 meeting.

The report review subcommittee members and schedule are attached. The final draft report is available on the CHNEP ftp site in the TAC April 8, 2009 Meeting folder at:
