

YOUR IDEA PAGE

The Charlotte Harbor National Estuary Program created this book to help young people who live in southwest Florida understand the natural environment they share with others, including plants and animals.

We hope that reading this book inspires you even more.
Please write down your ideas on ways you can use the information
in this book and ways you can learn more!

Send us your ideas (mhilgendorf@swfrpc.org) and we'll list them
on the website at www.CHNEP.org.

In 2008, readers asked for maps that show the travels of each animal.
These maps have been created and are now available at www.CHNEP.org.

The text of this edition of the book is also available
in Spanish on the website.
