# February

**RESERVOIR CONFERENCE**  
The Charlotte Harbor National Estuary Program has held many technical and public conferences to further our understanding of an issue important to the continued health of the natural environment. During the winter of 2009, the CHNEP will bring together those with expertise on reservoirs for a technical workshop to be followed by a public conference.

This is an important step in the CHNEP process of bringing public and private stakeholders together to discuss ongoing studies and critical environmental issues facing the region.

For more information, including dates and locations, go to [www.CHNEP.org](http://www.CHNEP.org).
